"A Thing of Beauty is a Joy Forever"

The illustrations in this book show what is available in the Julia Fischer Force quilt line. Any article in this book may be ordered from the store from whom you purchased the book.

In preparing these cut quilts we have tried to consider the quilt first along with the color and quality. If it is a good quilt with sufficient size we have figured its cost as economically as possible. We have not attempted to cut down or cut out or trick the article in any way to lower its cost.

We have felt that if a woman were to put hours of painstaking labor into a quilt she was entitled to the best we could give and not how cheaply we could give her an inferior article.

Preparing these cut quilts and pillows and quilt blocks is a most interesting work, and we wish at times we could follow them thru and see them completed and hear your remarks and the remarks of your friends. Painstaking effort is put forth to pack these boxes correctly and should an error occur we are anxious to make it right. Sometimes you lose a piece or two. Maybe one of the children are attracted to a bright print and make off with it. In either case we are anxious to help replace the part. We are anxious to help you complete the top satisfactorily.

CONSTRUCTION OF CLOTH used in quilts is as near "square" as possible.

QUALITIES—we cut in two qualities. One is 80 "square" percale. These goods have a black and white label and have 3 digits in the number (eg. 422). The other quality is of a much finer count goods of combed yarn and Mercerized finish. These are labeled in brown and tan and have 4 digits in the number (eg. 4422).

PRINTS are carefully selected to fit the purpose they are put to. These prints change about every 90 days. So, the prints used in a quilt cut in April will be different from one cut in October.

PLAIN COLORS sometimes vary slightly with each dye lot. So, it might not be possible to match an exact shade six months later.

COLORS are all fast vat dyed. Washing will not fade them.

EXTREMELY STRONG SUN-LIGHT will fade them over a period of time.

THE FINISH of the cloths used is soft. This permits running the needle thru many thicknesses at a time and gives greater ease in quilting.

For over a hundred years quilts have been made. The quilts of those days the Heirlooms of today. The quilts of today the Heirlooms of tomorrow.

Patterns have not changed to any extent. It is the pattern of years gone by that you like, you buy and you make today.

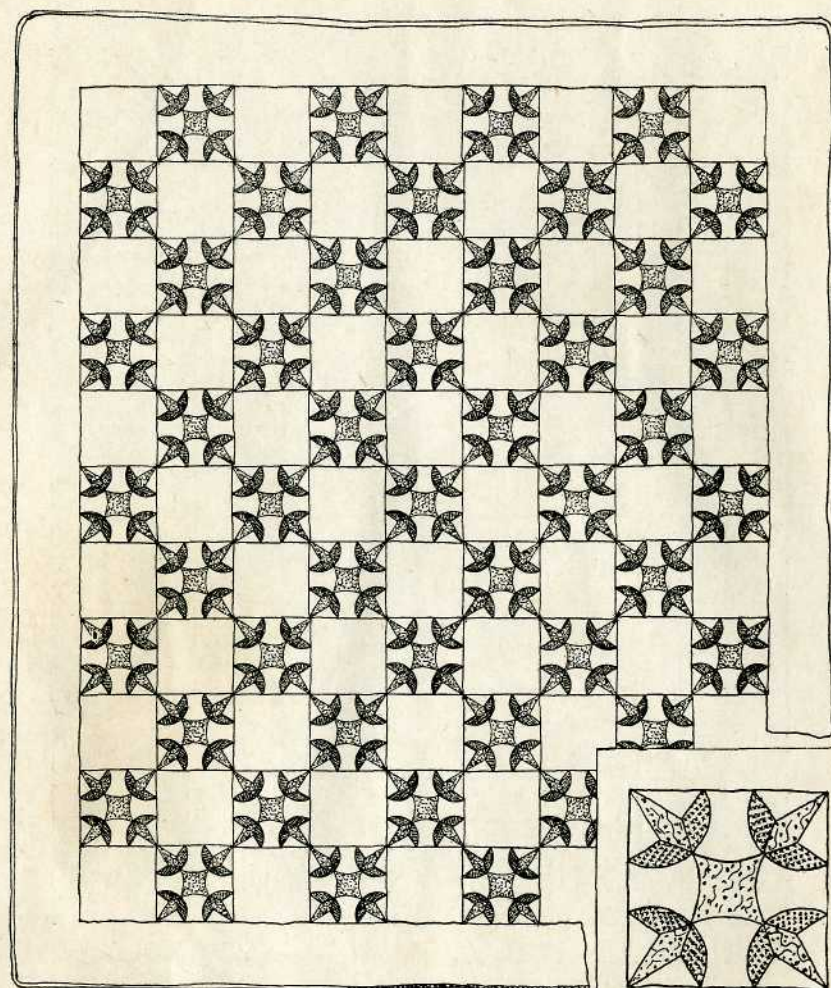

Today has added its color made possible by the variety of fast colors available. Also, there are the die cuts that place in your hands exactness and perfect fitting.

Time marches on and the Treasure Chests of the future will hold "the Quilt My Mother made" going from Mother to Daughter, Father to Son—an expression of love—a remembrance written in thousands of hand-made stitches—heirlooms.

If you have never made a quilt let us offer this suggestion. Select a simple one to begin with. Should you choose one of the more complicated patterns it will become tedious before you begin to make a showing. Then if the work really appeals to you go into the patterns you desire.

See notation on twin sizes on back page. Also if you are going to make a pair of twin quilts be sure to buy them both at once to insure that they match. Because print patterns change three or four times a year, and plain colors vary a trifle with different dye lots.
